

DISCLAIMER:

PHOTOSENSITIVITY/SEIZURE WARNING!

A very small percentage of individuals may experience epileptic seizures or blackouts when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or when playing video games may trigger epileptic seizures or blackouts in these individuals. These conditions may trigger previously undetected epileptic symptoms or seizures in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family has an epileptic condition or has had seizures of any kind, consult your physician before playing.

IMMEDIATELY DISCONTINUE use and consult your physician before resuming gameplay. If you or your child experience any of the following health problems or symptoms:

- Dizziness
- Altered vision
- Eye or muscle twitches
- Loss of awareness
- Disorientation
- Seizures or any involuntary movement or convulsion

RESUME GAME PLAY ONLY ON APPROVAL OF YOUR PHYSICIAN.

Use and handling of video games to reduce the likelihood of a seizure:

- Use in a well-lit area and keep as far away as possible from the television screen.
- Avoid large screen televisions. Use the smallest television screen available.
- Take a 15-minute break during each hour of play.
- Avoid playing when you are tired or need sleep.
- Stop using the system immediately if you experience any of the following symptoms: lightheadedness, nausea, or a sensation similar to motion sickness, discomfort or pain in the eyes, ears, hands arms, or any other part of the body. If the condition persists, consult a doctor.

VR Headset Safety Notice:

Before using, review the health and safety warnings in the VR headset instruction manual. Carefully follow all instructions for setup and use.

Review surroundings and clear obstacles before use. Take steps to prevent pets, children, or other obstacles entering the area during use.

Some people may experience motion sickness, nausea, disorientation, blurred vision or other discomfort while viewing virtual reality content. If you experience any of these symptoms, stop using immediately and remove the VR headset. If any of these symptoms persist, make sure to contact your physician.
